Experience

Atlassian / Senior Product Designer

AUG 2021 – PRESENT

Jira Service Management (AI-Native & Agentic Experiences)

- Designed agentic workflows transforming support from static interfaces to proactive, intent driven AI support and action oriented workflows to reduce the MTTRs by 80–90%
- Defined interaction patterns for AI assisted vs autonomous behavior, balancing trust, control, and usability.
- Reimagined the JSM issue view as a dynamic, AI native experience, surfacing relevant context, insights, and actions.

Marketplace Platform (Pricing, Packaging & Growth)

- Led end-to-end designs for App Editions, a platform initiative enabling app developers to package and price apps effectively.
- Drove proposals of usage based and flexible pricing systems, influencing long term Marketplace monetization strategy.
- Delivered improvements to partner experience, contributing to 23% increase in partner satisfaction and 12% revenue uplift.
- Led the product definition and execution of key Marketplace initiatives – privacy & security tab on app listings, FedRAMP, and partner facing improvements in app publishing journeys.

Leadership and Influence

- Led cross-functional alignment across product, engineering, research and GTM teams in ambiguous problem spaces.
- Influenced product direction by identifying experience gaps across surfaces.
- Mentored designers and contributed to raising design quality and systems thinking across teams.

Amazon / Product Designer, Post-Purchase

FEB 2019 – JUL 2021

- Owned design strategy for Amazon's post-purchase experience (India) across self-serve customer flows and agent-facing tools.
- Designed high scale systems including Contact Us, Your Orders, and Message Us, used by millions of users.
- Reduced support dependency by increasing adoption of self-serve flows and improving resolution efficiency.
- Partnered with data science, product, and customer service orgs to identify friction and drive experience improvements.

Xoriant / Senior Product Designer, IoT

SEP 2016 – FEB 2019

- Led end to end design of an IoT platform for oil & gas operations, covering workflow management, incident tracking, and plant performance.
- Designed predictive systems for equipment downtime and operational insights, improving decision-making for field teams.
- Collaborated closely with engineers and domain experts in high-complexity environments to reduce the incidents in plants.

Rolta Defence / Product Designer, Indian Army

FEB 2015 – AUG 2016

- Designed mission critical interfaces for a battlefield management system used by the Indian Army
- Built real-time visualization systems integrating inputs from multiple tactical sources
- Improved usability and efficiency in high-pressure, real-time operational scenarios

About Me

Skills

- Design Leadership & Strategy
- Systems thinking
- Agentic UX
- Platform design
- 0 → 1 problem solving
- Cross functional leadership
- Trust & transparency in AI
- User centered designs
- Vibe coding
- Accessibility
- Design mentorship

Education & Certifications

Certified Usability Analyst / HFI

2016

Human Factors International (2016–5950)

B.E Chemical / Mumbai Uni

2012

Thadomal Shahani Engineering College

Awards

Door Desk Award / Amazon

2019

Design X Award / UX India

2018

UX Innovator / Xoriant

2016
